Aurea

Group

Aurea Steel Oy Ab and PKP Machining together form a competitive engineering workshop entity, the Aurea Group offers competitive industrial metal fabrication with strong ownership-, customer- and production process synergies.

The group has totally 17.000 m2 sheltered production space and heavy lifting capacity. We in Aurea Group have common production- and HSEQ-processes. On top of this, we share the same values with an energetic and enthusiastic approach the "we get it right" -culture.

The customer and safety come first!

- Parts manufacturing
- Welding and fabrication
- Heat treatment
- Machining
- Surface treatment
- Assembly

PKP MACHINING

PKP-Machining site in Riihikoski has specializes in machining medium and heavy weight pieces weighting up to 120 tonnes. We offer manufacturing of prototypes and repair machining, putting solid expertise at your disposal.

Our products and metal fabrication engineering services are used in many fields, but our strongest special expertise lies in the CNC boring of large pieces, milling, and deep-hole boring. Our repair machining service includes sleeving, build-up welding of shaft journals, metal spraying, and the manufacture of spare parts.
